

Ecology Survey & Mitigation Timetable

	Jan	Feb	March	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Survey ¹	Extended Phase 1 Habitat Survey											
	Bat Building / Tree Assessment											
	Bat Roost Dusk Emergence / Re-entry											
	Bat Activity Survey											
	Bat Hibernation Survey											
	Badger Survey											
	Badger Bait Marking Survey											
	Otter Survey											
	Water Vole Survey											
	Dormouse Survey (Nut Search)											
	Dormouse Survey (Nest Box / Tube)											
	Bird Survey (Wintering)											
	Bird Survey (Breeding)											
	Reptile Survey											
	Great Crested Newt Survey											
	GCN eDNA Survey (15 April to 30 June)											
	Invertebrate Survey											
	Vegetation Survey											
Mitigation Works ²	Bats*											
	Badger											
	Otter*											
	Water Vole											
	Dormouse											
	Breeding Birds											
	Reptiles											
	Invertebrates											
	Great Crested Newts											
	Vegetation											
KEY	Optimal											
	Sub-optimal											

¹ Surveys are timed according to seasonal variation, location & the species surveyed.

² * Mitigation works & other activities which have the potential to disturb protected species, are timed according to seasonal variation, location & the species in question.

Otters are active throughout the year & timings will be site-specific. The timing for works affecting bat roosts will depend on the type of bat roost present.

IMPORTANT NOTE: This table is intended as a guideline only. Please contact a qualified ecologist for further information.
